

Create Your own 'Rescued by Rover' Blair puppet.

You will need:

- 1 Lolly Stick
- 4 Split Pins
- The picture of Blair's separate head, body, legs and tail
- Scissors
- Cellotape

1. Carefully cut out each of Blair's body parts.
2. Using split pins, attach each body part to the main body: Pierce a hole in the paper with the split pin and fold over to secure. Now Blair can move!
3. Using cellotape, stick the lolly stick to the main body, between legs. Make sure not to stick it to the leg pieces.
4. Your Blair puppet is ready to star in your very own production of 'Rescued by Rover'!!
