

Woodworking tools

Draw a line to match the tool to its use

Adze - for smoothing, gouging and hollowing out all types of wooden objects.

Wood plane - for shaping wood using muscle power to force the cutting blade over the wood surface.

Set square - for checking the accuracy of right angles.

Spoke-shaves - for smoothing wood surfaces on wooden shafts such as spokes, spindles, rods, handles.

Carpenters' ruler - for measuring dimensions. It can be folded to fit neatly into a pocket.

Name stamp - for stamping the owner's name on the handle of the tools so they did not lose them.

Whetstone - for sharpening the edge of steel tools such as knives.
